

HELATRIP • MOBILE PROTOTYPE • PHASE 2-4

Discovery, itinerary & booking flows

Ten high-fidelity screens for a Sri Lanka travel app — search-first discovery, editorial destination pages, day-by-day itinerary builder, and a verified-operator booking flow. Three visual directions share the same tokens and components; dark mode and LKR / USD currency are first-class.

FORMAT

Flutter · Material 3 · iOS reference
frame

AUDIENCE

Inbound tourists · Domestic
travellers

SCOPE

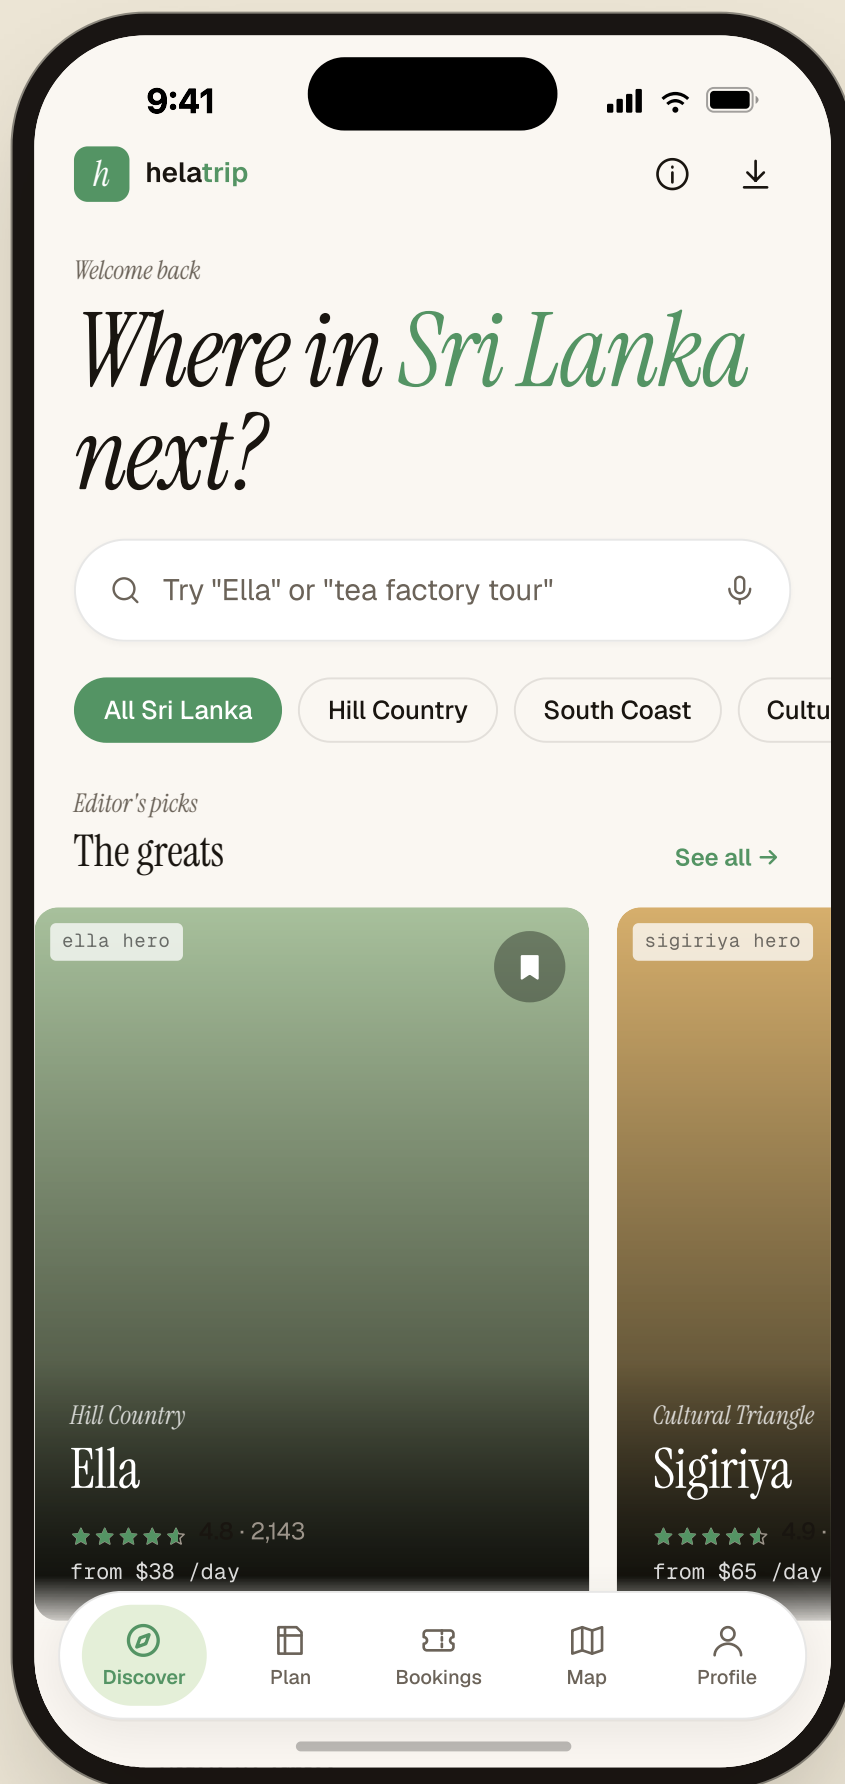

Discover · Plan · Bookings

01 / 10

Discover

DIRECTION • EDITORIAL (LIGHT)

Search-first entry. Italic-serif headline, hairline-pill search bar, scrollable region chips, hero carousel with regional gradient tints, three-column category grid, and a curated-routes shelf. Saved-state bookmark icons persist to local storage.

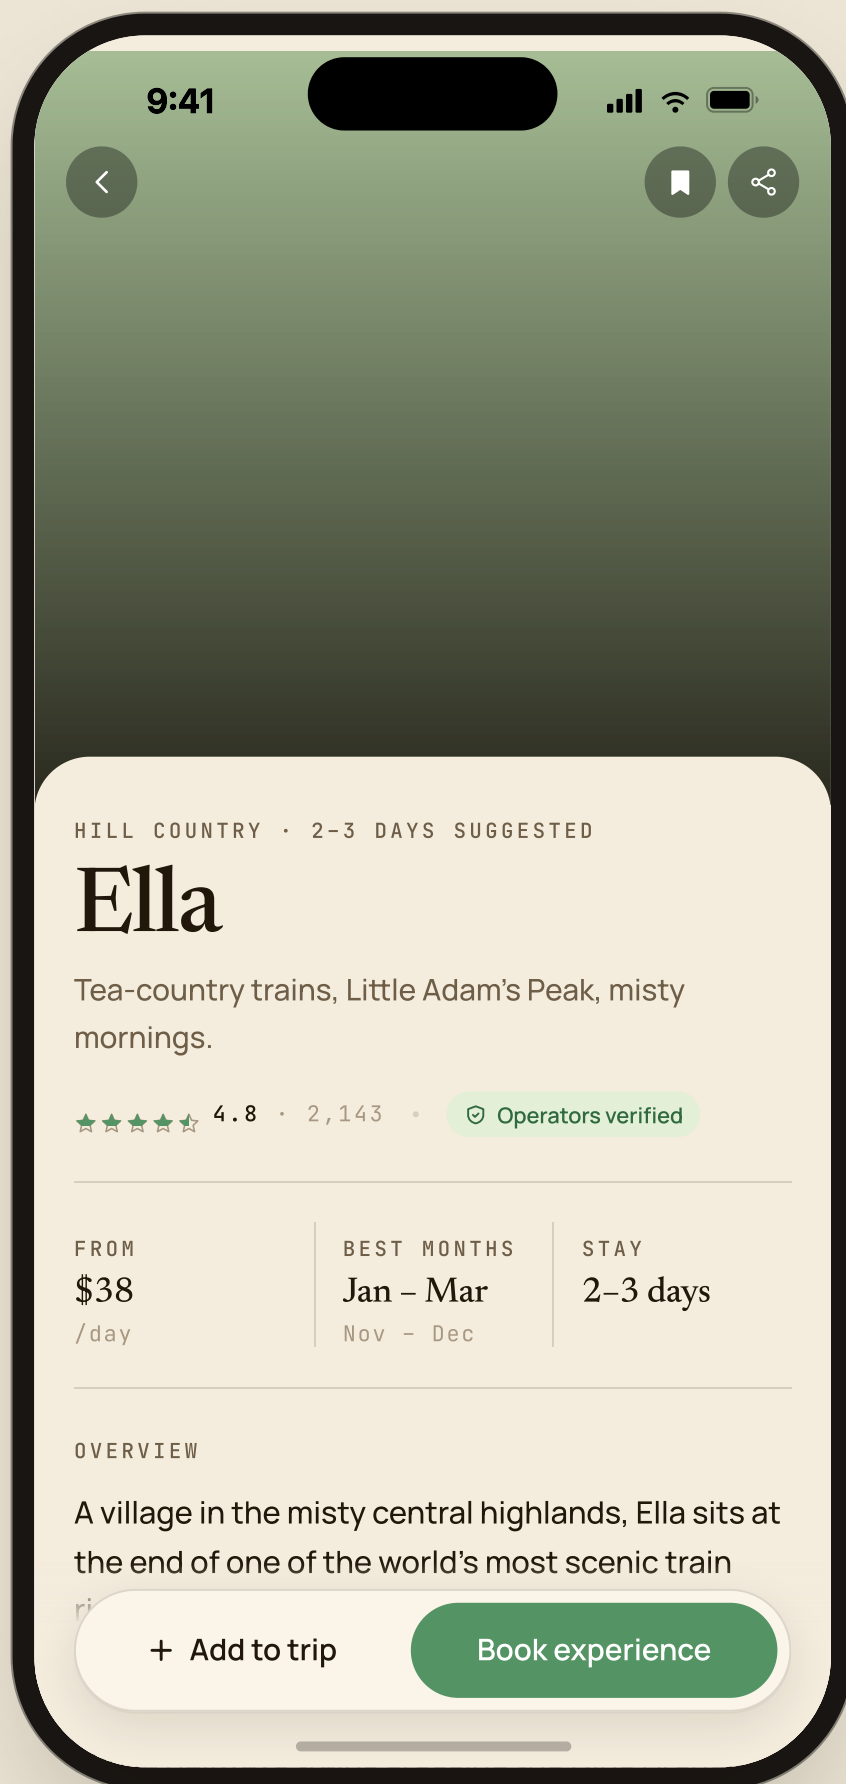

02 / 10

Destination detail

DIRECTION • FIELD GUIDE (LIGHT)

The showpiece. Immersive hero (regional gradient), large serif title, 12-month weather strip with monsoon dot indicators, numbered highlights, decorative map snippet, verified-operator experience cards, real reviewer initials and country flags, sticky CTA pill.

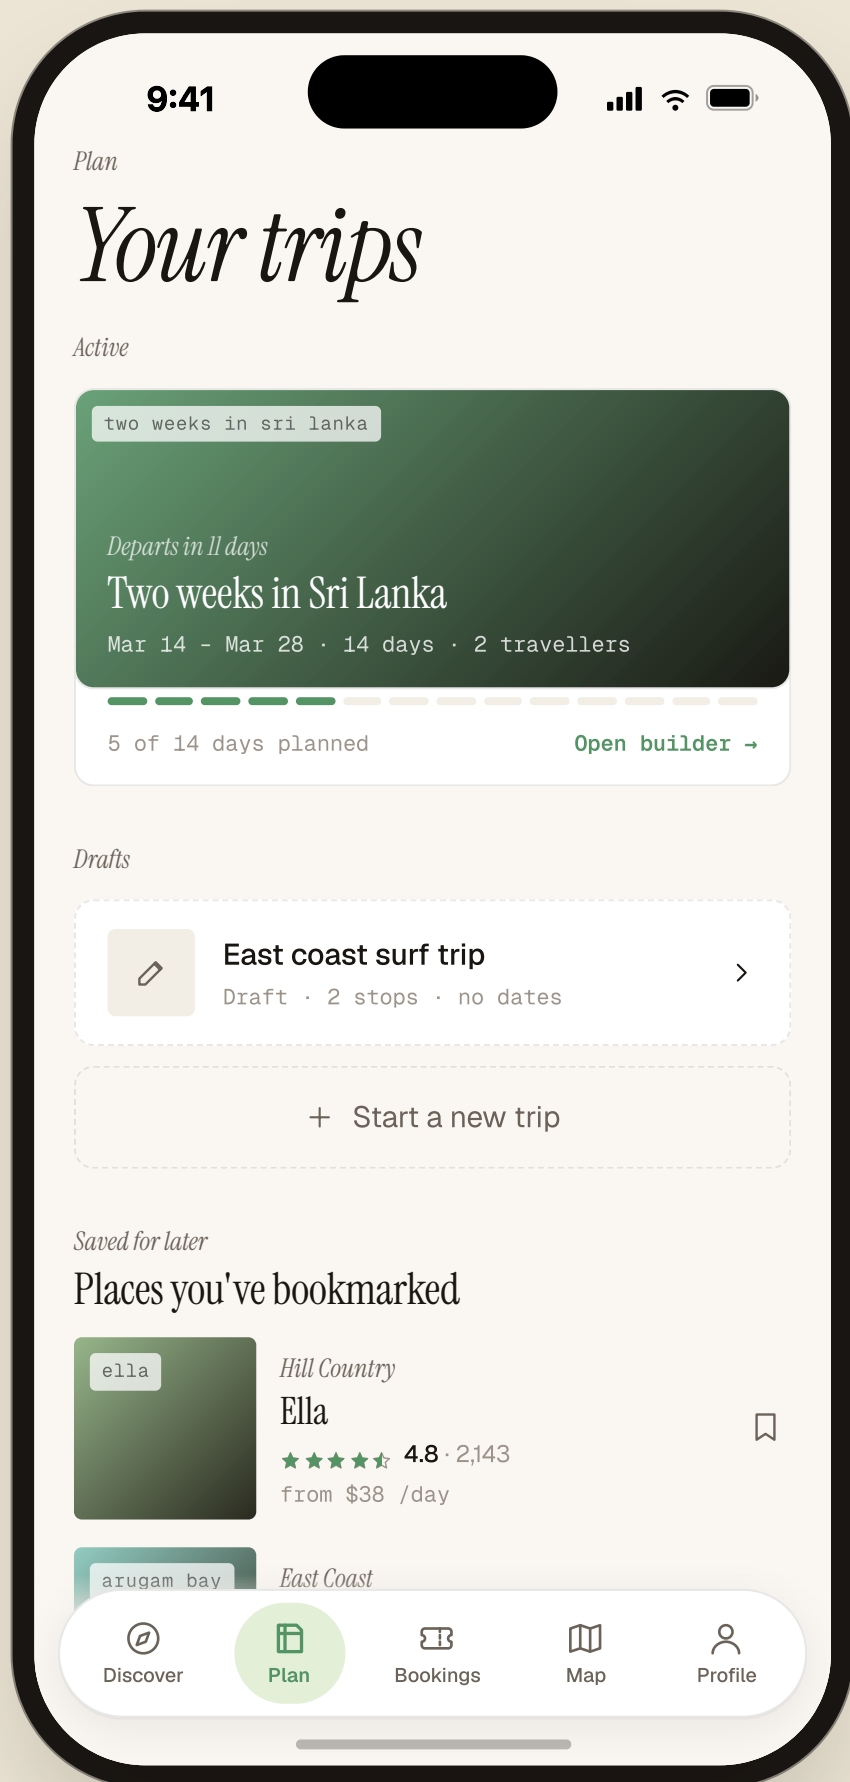

03 / 10

My trips

DIRECTION · EDITORIAL (LIGHT)

Plan tab landing. Active trip cover with a 14-day progress bar, dashed-edge drafts row, and bookmarked destinations below. Empty states are designed primitives, not afterthoughts.

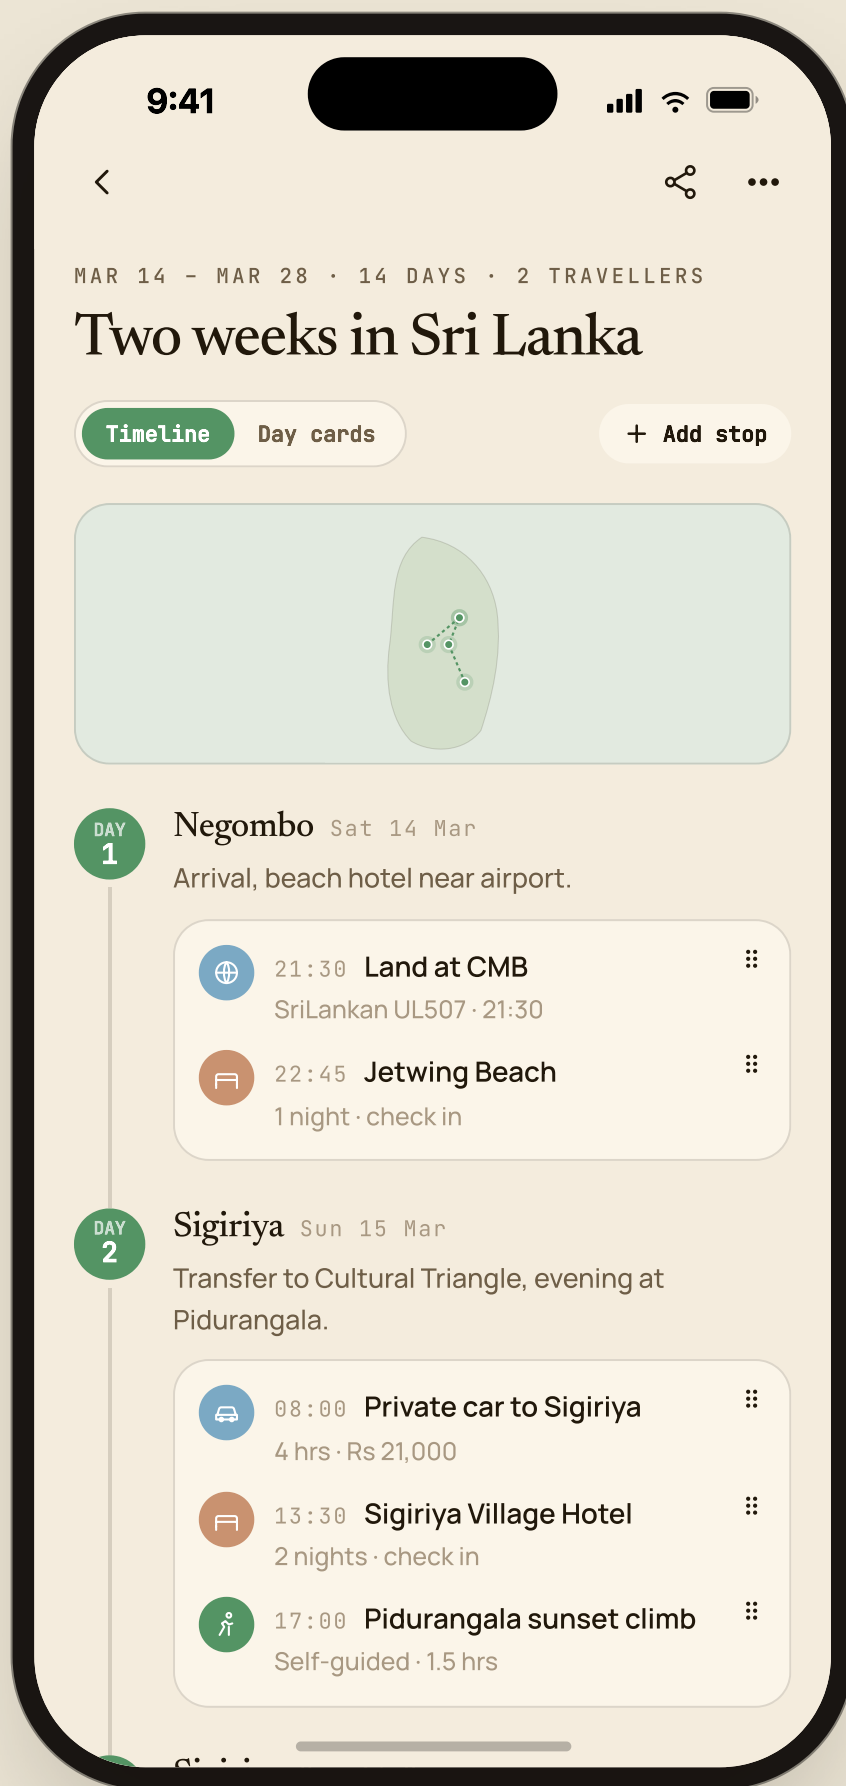

04 / 10

Itinerary builder

DIRECTION • FIELD GUIDE (LIGHT)

Day-by-day vertical timeline with route map preview, segmented Timeline / Day-cards toggle, and per-stop drag handles. Each stop shows time, mode-coloured pin, title and inline sub-meta. Travel-time pills auto-recalc between adjacent stops.

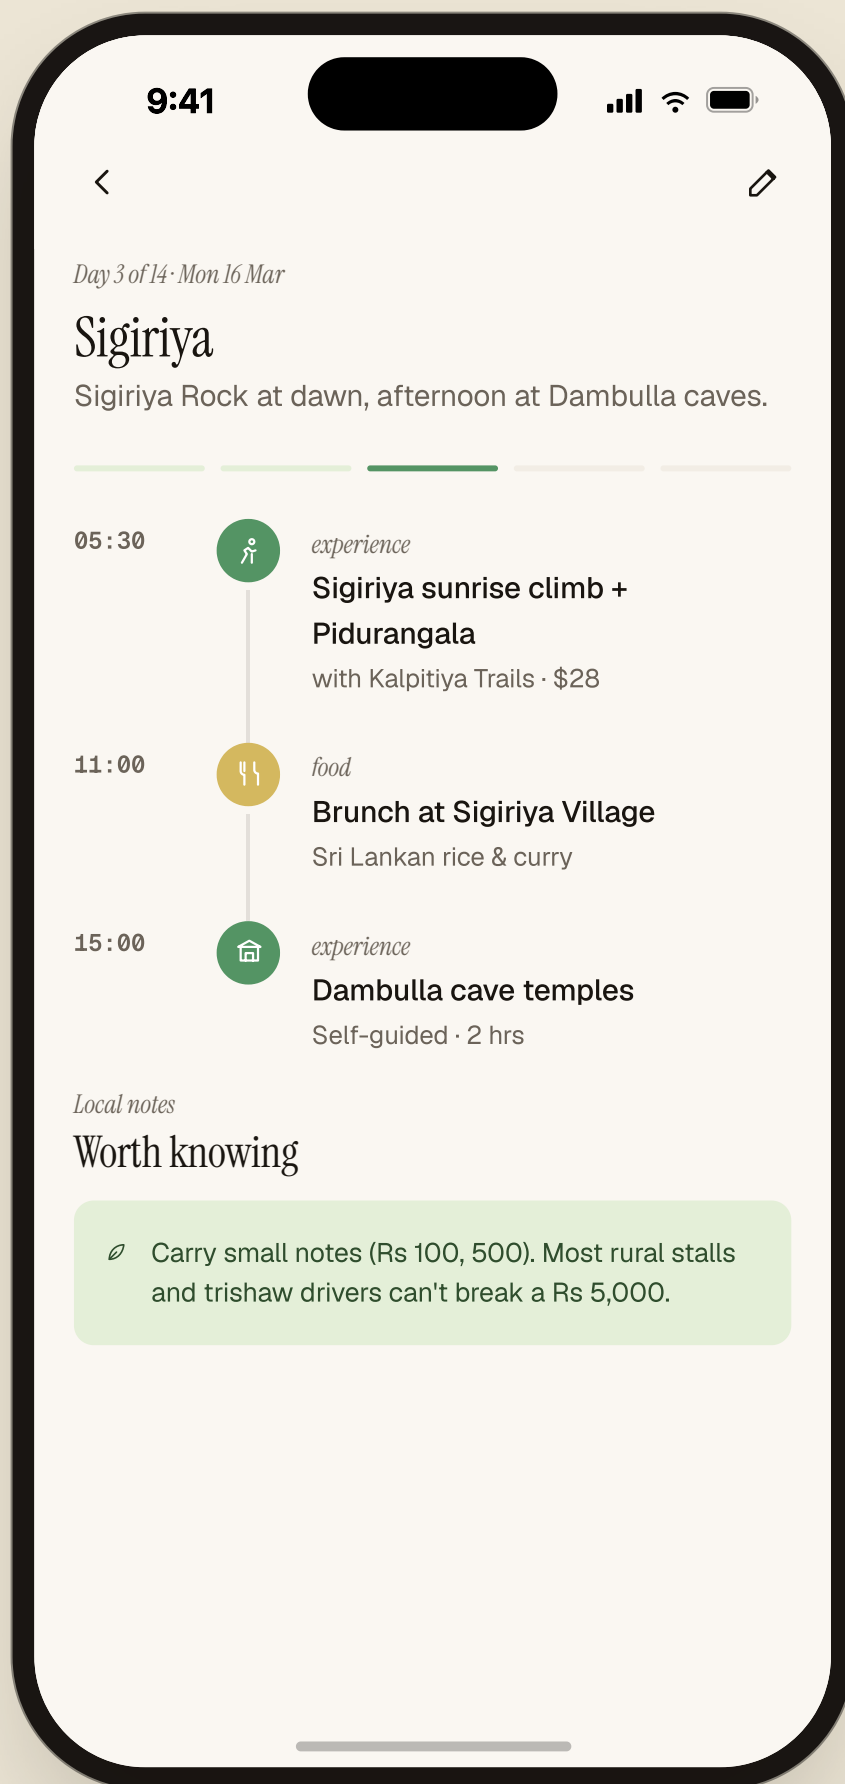

05 / 10

Day view

DIRECTION • EDITORIAL (LIGHT)

Drill-down on a single day. Status-strip pagination across all 14 days at top, then a large vertical timeline of stops — each with its time on the left rail, mode-coloured pin, title and notes. Local advice card at the bottom keeps tone editorial.

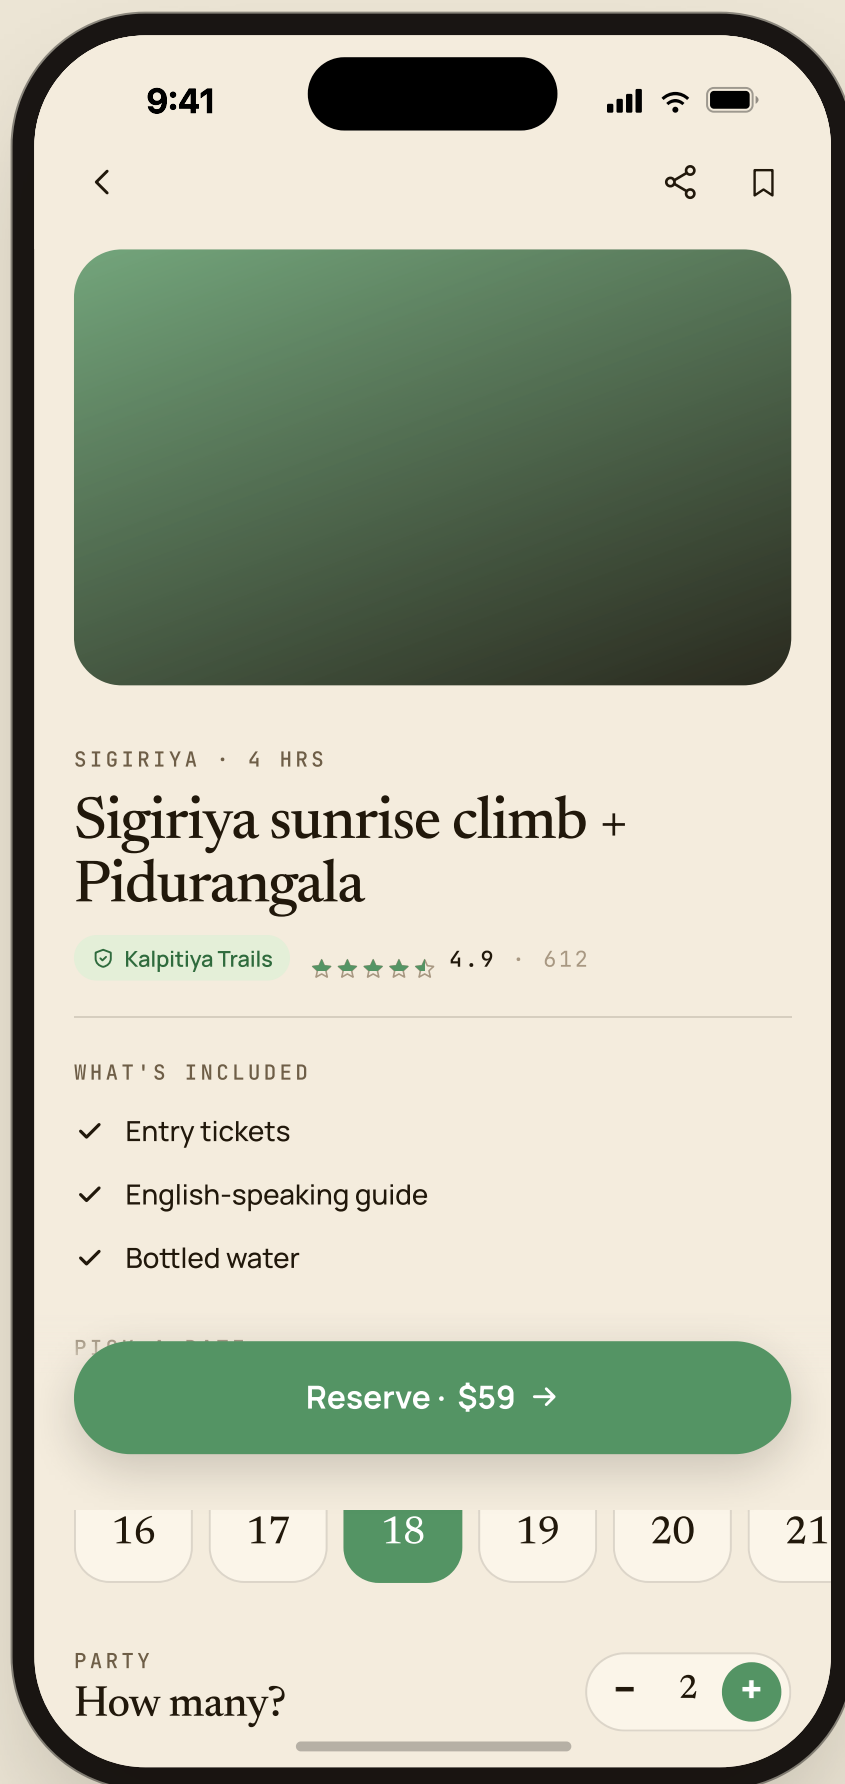

06 / 10

Experience detail

DIRECTION • FIELD GUIDE (LIGHT)

Pick-and-book in two actions: scrollable date strip, party-size stepper, currency-aware total. Trust chips ('Booked 47× this week', free cancellation, instant confirmation) sit above the breakdown — urgency without flash-sale theatre.

07 / 10

Checkout

DIRECTION • FIELD GUIDE (LIGHT)

Step 2 of 3. Trip summary card with inline Edit, guest fields with eyebrow labels, currency-aware payment radio (Card for USD users, PayHere recommended for LKR — no FX). T&C gate disables Pay until accepted.

08 / 10

Confirmation

DIRECTION • FIELD GUIDE (LIGHT)

Offline-first ticket. Big success state, deterministic QR (no remote dependency), four-tile action grid (calendar, directions, share, PDF), and a three-step 'what's next' checklist. Booking ref is the title of the page when opened from Bookings.

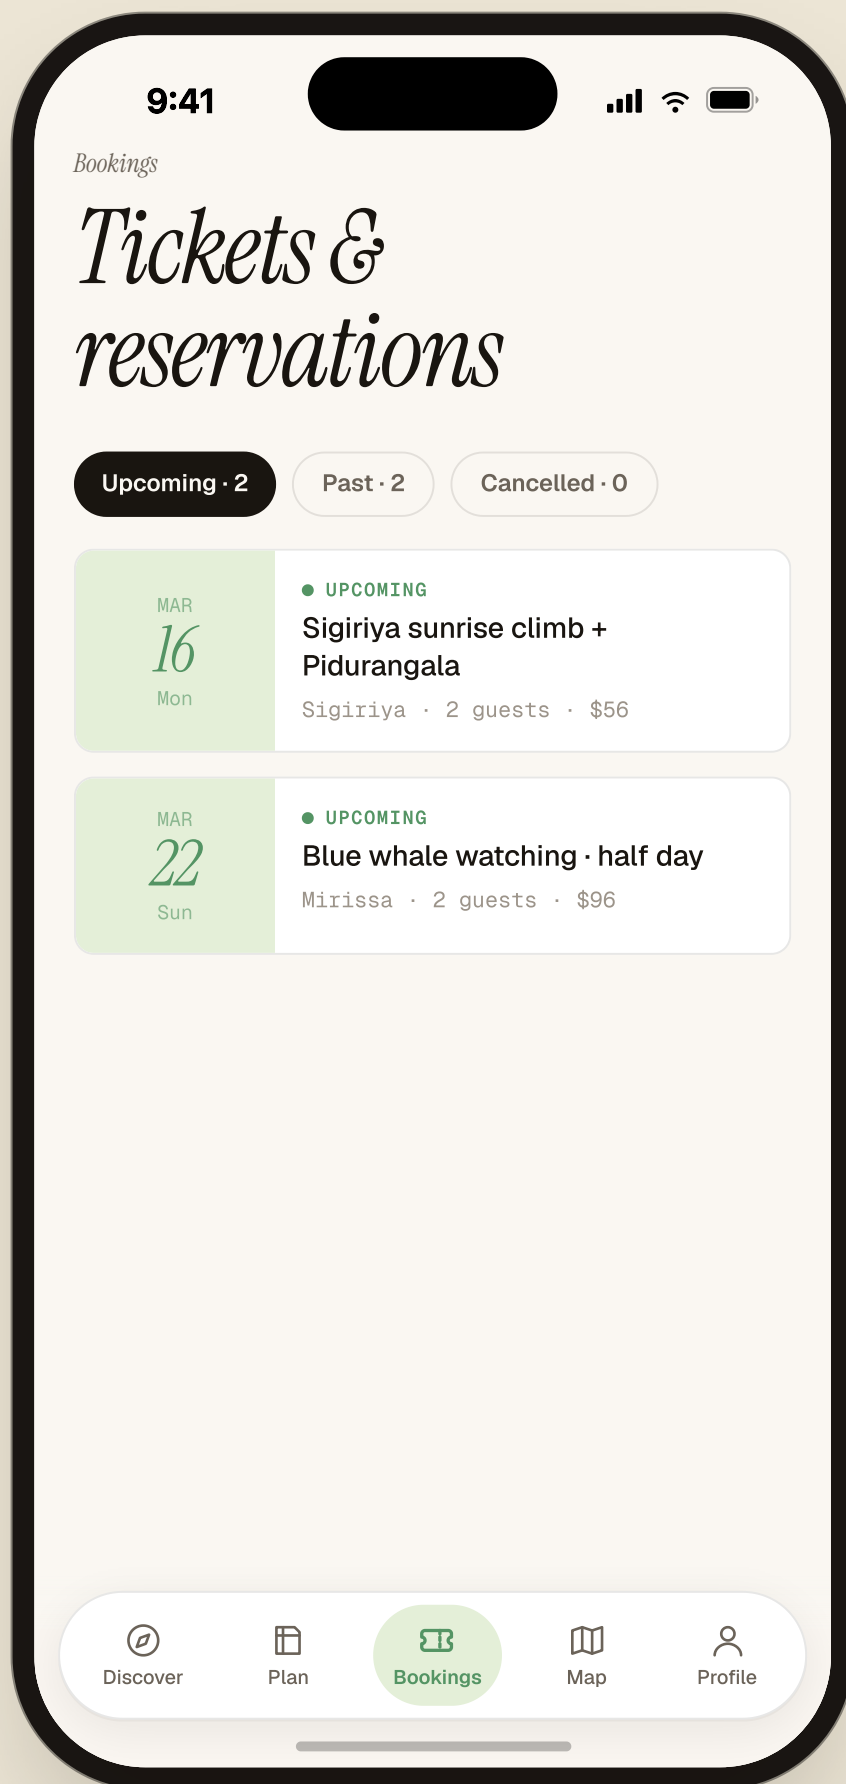

09 / 10

Bookings list

DIRECTION • EDITORIAL (LIGHT)

Upcoming / past / cancelled tabs. Each card is a date-block on the left (mono month + display-numeral day) and a stop-meta block on the right with status dot. New confirmations land at the top of Upcoming immediately.

10 / 10

Dark mode

- Postcard direction

DIRECTION • POSTCARD (DARK)

Identical layout, deep-black surface, DM Serif Display headlines. Brand green still anchors active states; surfaces drop to #161412. Demonstrates that any direction × any theme combination produces a coherent app.
